

1st MEENAS webinar 2024

"Strategic Research Plans for Environmental and Medical Radiation Protection Research" April 18th, 16:30–18:30 CEST

MEENAS represents six European radiation protection research platforms: [MELODI](#), [EURADOS](#), [EURAMED](#), [NERIS](#), [ALLIANCE](#) and [SHARE](#). Each of these platforms has developed and is constantly updating its own Strategic Research Agenda (SRA). These SRAs are embedded into a Joint Roadmap in radiation protection research, and sometimes they are also part of larger SRAs. MEENAS has decided to showcase and promote the SRAs of the platforms in a series of three webinars in 2024.

The first webinar of this series will cover the strategic research plans for environmental radiation protection research outlined in the [ALLIANCE SRA](#) and the strategic research plans for medical radiation protection research represented in the [EURAMED SRA](#), which was recently updated as part of the [EURAMED rocc-n-roll SRA](#). The SRAs as well as interlinks between them and connections to other areas will be presented and discussed during the webinar. The programme follows below.

Time	Title	Speaker
16:30-16:35	Welcome and introduction	Christoph Hoeschen
16:35-17:10	The Alliance SRA	Rodolphe Gilbin
17:10-17:45	The EURAMED SRA as part of the EURAMED rocc-n-roll SRA	Christoph Hoeschen
17:45-	Q and A session	all

The webinar is free of charge, but registration is required.

Registration details

After registering via the link below, you will receive a confirmation email containing information about joining the webinar.
