

Agnieszka SZUMSKA

Agnieszka Szumska studied medical physics and dosimetry and graduated in 2010 from AGH University of Science and Technology, Krakow, Poland. She received her Ph.D. in physics from the Institute of Nuclear Physics Krakow in 2015.

Since 2011 she has been working at IFJ PAN. First, in the Laboratory of Individual and Environmental Dosimetry, where she developed and introduced routine measurements the method of measuring the doses for the eye lenses., and later in

the proton therapy center. In 2019, she became the Head of the Radiation Protection Department.

Since 2012, she has been actively participating in research conducted by the EURADOS and she is a member of two working groups: WG2 and WG12. She was the Chair of the Local organizing committee during the IM2022/Neudos-14 conference.

Her main scientific interest and competence are in the field of radiation protection.
