

## Announcement of the EURADOS Intercomparison 2024 for whole body dosimeters (IC2024ph)

EURADOS, through its Working Group 2 (WG2), has established a programme self sustained dosimetry intercomparisons (IC) for individual monitoring services (IMS) with the aims of improving the harmonization of individual monitoring and helping IMS to comply with ISO 17025. Eight ICs for whole body dosimeters, three ICs for extremity dosimeters and one combined IC for extremity and eye lens dosimeters have been completed since 2008. **EURADOS now has the pleasure of announcing IC2024ph for whole body dosimeters.**

### Scope

The 2024ph intercomparison is for whole body dosimeters used for the assessment of  $H_p(10)$  and/or  $H_p(0.07)$ . Irradiations for photons will be carried out in an accredited or primary standard European irradiation facility in terms of  $H_p(10)$  and  $H_p(0.07)$  in the following ranges:

- > Energy: 30 keV to 1.3 MeV
- > Dose equivalent: 0.2 mSv to 1 Sv
- > Angle of incidence:  $\pm 60^\circ$

### Intercomparison procedure

IMS wishing to participate will complete the application form which can be accessed after registration on the IC2024ph on-line platform (IOP). The participating IMS will be informed when the applications have been accepted.

On acceptance of the application, the participants will receive an invoice from EURADOS and instructions for dosimeter labelling and despatch.

**The participation fee is 1350 Euro per dosimetry system. EURADOS sponsors will pay 1215 Euro for one system and 1350 Euro for any additional systems. Fees must be transferred in advance to the EURADOS bank account (bank transfer costs have to be paid by the participant) after receiving the invoice from EURADOS. Refunding will only be possible in the unlikely event that the intercomparison is cancelled by EURADOS.**

The fees have been calculated on a non-profit basis and any surplus money will be used to support the harmonisation of individual monitoring and other EURADOS activities.

For this intercomparison a total of 30 dosimeters are required per registered dosimetry system.

- > 20 dosimeters for irradiation
- > 10 transit / spare dosimeters

After the irradiations have been carried out, the coordinator will return the dosimeters to the participants for readout. Within one month from receiving the dosimeters the participants will submit the results in terms of  $H_p(10)$  and/or  $H_p(0.07)$  in accordance with the procedures specified on the IOP.

After the deadline for submitting results to the coordinator has passed, participants will receive details of their response values. Change of results after distribution of the irradiation data will only be possible in case of technical or administrative errors made by the irradiation laboratory or the coordinator.

After confirmation of the results, EURADOS will provide the participants with a “Certificate of Participation” including information on the irradiation qualities, doses, response values and overall uncertainties for all irradiations.

### Intercomparison Report

The Organization Group will prepare a report summarizing the results of the intercomparison. The report will include the names of the IMS that have participated, the types of dosimeter and a photograph of dosimeters used but the results will be presented anonymously.

Intercomparison results will be treated by EURADOS as confidential data and IMS identity will not be disclosed. Data used in technical and scientific studies will be anonymous. The Organization Group has appropriate procedures agreed to ensure confidentiality and the participants results will be known only to a minimum number of persons within the Organization Group.

### Provisional Schedule – dates to be confirmed

Announcement - call for participants	6 July 2024
<b>*Registration of participants and systems</b>	<b>July 2024</b>
Deadline for IMS sending application forms	1 August 2024
Deadline for IMS sending dosimeters to Coordinator	1 September 2024
Irradiations	Oct – Nov 2024
Coordinator sending dosimeters for readout	December 2024
Deadline for IMS sending dosimeters results to Coordinator	January 2025
Final results available	March 2025
<b>IMS receiving certificates of participation</b>	<b>April 2025</b>

### EURADOS Intercomparison 2024 Organization Group

Tom Grimbergen	Mirion Dosimetry Services, NL
Hannes Stadtmann	Seibersdorf Labor GmbH, AT
Markus Figel	Mirion Medical GmbH, DE
Ana Romero	Ciemat, ES
Wioletta Dobrzynska	Cavendish Nuclear, UK
Andrew McWhan	Charthouse Data Management Ltd, UK

### Coordinator:

Christian Gärtner	Seibersdorf Labor GmbH, AT
